**Bhupesh Chauhan**
Software Engineer|Full-Stack Web Developer
7017626186 bhupeshchauhan750@gmail.com bhupeshchauhanz bhupeshchauhanz

## Professional Summary

Software Developer with strong expertise in full-stack web development, data structures, and backend integration. Experienced in building scalable applications using the MERN stack, REST APIs, and real-time data integration. Strong problem-solving ability with consistent coding practice on LeetCode and HackerRank.

## Skills

**Frontend:** HTML5, CSS3, JavaScript, React.js, Flutter
**Backend:** Node.js, Express,js
**Databases:** MongoDB, MySQL
**Languages:** C, Java, Python
**Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
**Tools:** Git, GitHub, VS Code, REST APIs, N8N
**Soft Skills:** Solving, Team Collaboration, Effective Communication, Time Management, Adaptability, Attention to Detail.

## Experience

**Web Development Bootcamp** **(May 2025 – June 2025)**
• Covered HTML, CSS, JavaScript, Data Structures & Algorithms (DSA), and Communication Skills through structured sessions and hands-on projects.

**Hackathon Experience** **(2025)**
• Participated in a team-based hackathon, contributing to project planning, development, and team collaboration under strict time constraints.

**AI Workflow Automation Course (N8N)** **(2025)**
• Completed an AI workflow automation course using n8n, building automated data flows, API integrations, and task orchestration projects.

## Projects

**Expensely – Multi-Service Personal Finance System** **(2025)**

- **Summary:** Built a scalable personal finance management system that helps users track expenses, manage financial accounts, and visualize spending data through a modern dashboard.
- **Tools/Technologies Used:** Next.js 15, React 19, Tailwind CSS 4, Node.js, MongoDB, Docker, API Gateway.
- **Key Features:** Developed modular microservices (Auth, Expense, Card, Bank), and real-time financial dashboards.
- **Key Takeaway/Application:** Learned microservices architecture, API gateway design, building scalable full-stack applications with modern frontend frameworks.

**NutriSeva – Smart Nutrition Recommendation Platform** **(2025)**

- **Summary:** Developed a personalized food recommendation system based on health conditions, allergies, and dietary preferences.
- **Tools/Technologies Used:** HTML, CSS, JavaScript, Python, MySQL.
- **Key Features:** Created user profiles, rule-based food suggestions, database-driven content, and interactive interfaces.
- **Key Takeaway / Application:** Strengthened skills in backend logic, database integration, and real-world problem-solving applications.

**Toll Fuel Pro – Smart Toll & Fuel Utility App** **(2026)**

- **Summary:** Developing an Android application to calculate toll costs, locate nearby fuel/EV/CNG stations, and display city-wise fuel prices.
- **Tools/Technologies Used:** Java (Android Studio), Firebase, OpenStreetMap APIs, Location Services.
- **Key Features:** Implemented real-time location tracking, station navigation, toll computation using datasets, and user profile management.
- **Key Takeaway / Application:** Gained experience in mobile app development, cloud backend integration, and large-scale location-based systems.

## Education

Sharda University 2023 – 2027
**Bachelor of Technology in Information Technology, India** **CGPA- 8.0**
B.K. Public School 2021-2022
**Class XII PCM** **60.2%**
